LOCAL AGENTS WANTED. We destre to procur the services of a local agent in every Postoffice District in the State, Will our friends act, or procure the services of some efficien p rson in our behalf? Believing that the circulation of the Democrat may be materially extended, we make this appeal to our friends in its behalf.

The President seems to think he can do anything that tends to put down the rebellion, and that he can select the means at his best discretion and judgment. This is a wild and extravagant idea. Certainly, if he would reflect a moment, and cousider to what such a principle would lead, he could not eutertain such au opinion. Does he suppose he could establish slavery of the black race in all the free States if he thought it would put down the rebellion? Could be enslave classes of white people if it would put down the rebellion? Could be dispense with courts of the United States, disperse the judges or arrest them, if it would put down the rebellion? Could he remove the Governors of States and appoint their successors if it would put down the rebellion' Could be abolish the institution of marriage, and change the laws of descent of property, if it would put down the rebellion?

Could be disperse Congress, seize the purse as well as the sword, if, in his judg ment, it would put down the rebellion?

If he thinks he can do all these things. will be tell us what he could not do? for the people would like to know.

What the President has proposed to do in that proclamation is as much out of his power, if we look at the Constitution of our Government, as anything that can be conceived. If he can do it, what can't be do. and what is our Government but a despot-

These are grave questions, Mr. l'resident, and will startle not only the people of this country, but every people accustomed to constitutional liberty.

If our institutions allow such power as that in the Executive, it is high time they were changed.

Surely the generations before us, nor the present one, never suspected the existence of such a jower in the Executive. We had thought we had a Government of laws and Constitutions; but if this power exists in the Executive, one institutions are the worst that man has been able to live under in any country.

We are aware of the sophistry by which this power is sustained; its use is nothing new in the world. There never was a usurpation without an excuse; but look, Mr. President, to what it leads, and is it not a perfect reductio ad absurdam? Shall we listen to a logic that forces us to such a persuele, no regard for right or humanity conclusion? We need not examine each step. There is the precipice to which the road lends-a despotism.

The autouncement of such a doctrine has united the people of the secoded States, it has divided the people of the loyal States and it has divided the counsels of the Cab inet. Loyal men will r. t give up the contest for such awful blunders; for the President is not the cause, nor the country: but they put on record their solemn prostest against such productions. They create monstrous obstacles in the way of the cause that have to be removed. They cost treasure and blood. They open the road to anarchy; for constitutional and legal restraints are obliterate l.

If the President wants success, let him abandon such wild schemes and projects. Those who urge them are crazy; stark mad; unfit to be tolcrated in a free country. They run headlong into all the heresies of rebeldom itself, which began and which lives by the exercise of obtaining nower.

PT The rumor that the President & Co. were immediately responsible for the disasters of Fredericksburg is denied explicitly by General Burnside's letter, and, as we have spoken with some severity about it, we gladly make the amend and give them the benefit of the statement. Buruside declares that neither the time nor place was that selected by Halleck & Co., and gives reasons of some plausibility for his change, one of which is the arrival of the necessary articles for crossing the river earlier than was expected on the occasion of his visit to Washington. It is a pleasure to learn that at least once the army contractors have been more forward in furnishing supplies than in drawing their pay, and we are glad to record it. As far as General Burnside can acquit these men at Washington he has done it; but there is muother tribunal by which they are to be tried, and one that will hardly he as lenient. The dirests. The loss of the rnemy in killed and wounded is very great, and together will reach nearly, if not quite, two thousand, Our loss in killed and wounded will not exced six hundred, so far as I can learn, In the part of the battle fought by the army of Gen. We have to-day issued rations to five hundred and fifty of their wounded, now within the lines of our pickets, and there are far more in the houses

A Handsome Present.

Mr. Jesse li. Middleton, one of the wellknown proprietors of the New York Store, on Fourth streel, was the recipient Monday evening of a most beautiful and costly gold chain, as a token of the esteem and admiration of the young men in his employ. The presentation took place at the St. Charles, on Sixth street, by our young friend, Mr. Ben. C. Barker, who represented the party. About ten o'clock, when the entire party had gathered around the festive board, Mr. B. arose and said:

To which Mr. Middleton replied:
